"Chris Diamond has designed and implemented our home redecoration in a series of well managed projects using her considerable expertise to make it unique and comfortable. She has introduced us to the latest technology and design features and we have been extremely pleased with the process and results.

Chris works only with high quality suppliers and with craft specialists who create bespoke furniture designed by her. We have been impressed not just by her attention to detail but also her determination to create a narrative that belongs to us and makes our setting unusual. She has shown sensitivity and patience in advising us throughout this journey by taking on board what we wanted but also guiding us in the right direction.

It has been a real pleasure to work with Chris and her team. I am happy to recommend her as she has worked very diligently and creatively to meet our needs. The end result is truly amazing."
